# HOW TO MEASURE ARCHED ARCHITRAVES

Store: _____   **Phone No: (0___)_____**

Contact: _____   **Fax No.   (0___)_____**

NOTE: If the arch is a true half of the circle, the vertical measurement will be half of the horizontal one

Material sizes

V = Vertical in mm

Quirk Standard 3 to 5 mm

H = Horizontal in mm

a   b

STEP 1:   Measure **H** in mm: horizontal internal window width.

STEP 2:   Measure **V** in mm: Vertical internal window height taken from the **centre** of the horizontal line between points (a) and (b) as shown in diagram above

STEP 3:   Add set back for architrave from inside edge of window frame (Quirk).

Standard Quirk = 3 to 5 mm. See diagram above

STEP 4:   **To match your architrave profile/size of material/type of timber or MDF, please provide 100 mm long sample.** It can be mailed.

STEP 5:   Supply code of profile if available.

STEP 6:   If your window is not true radius, please supply template.

NOTE: We will supply the architrave longer so you can cut to size

EXAMPLE: How many windows the same   Generally 3-5 mm

CODE: _____   **Quantity:** _1_   **Horizontal:** _1200_ mm **Vertical:** _600_ mm   **+ Quirk:** _3_ mm

MATERIAL: **Size:** _90_ x _42_ **mm**   ☒ **MDF** ☐ **LOSP T / PINE or OTHER** _____

TO ORDER, FILL IN BELOW

CODE: _____   **Quantity:** _____   **Horizontal:** _____ mm **Vertical:** _____ mm   **+ Quirk:** ____ mm

MATERIAL: Size: _____ x _____ **mm**   ☐ **MDF** ☐ **LOSP T / PINE or OTHER** _____

Please note that it is your responsibility to check all sizes are correct.
